

## 4<sup>th</sup> European Midwest Micro/Macro Conference (EM<sup>3</sup>C)

### Call for Papers

On **December 2-3, 2022**, the 4th European Midwest Micro/Macro Conference (EM<sup>3</sup>C) will take place in **Frankfurt, Germany**. The conference will focus on the role of microdata for macroeconomics. Microdata for the purposes of EM<sup>3</sup>C is broadly defined and includes (but is not limited to) survey data, administrative data, experimental data, expectations data, etc. Work with new, previously unexplored microdata is especially welcome. The macro part of EM<sup>3</sup>C is also broadly defined and includes growth and business cycle topics, fiscal and monetary policy, consumption, investment, labour topics, price setting, sentiment and uncertainty research, etc.

The conference is sponsored by Frankfurt School of Finance & Management, safeFBDC, ECONtribute: Markets and Public Policy, and the European Research Council (ERC), and is hosted at Frankfurt School. EM<sup>3</sup>C is a joint initiative of economists working at the intersection of micro and macro in Europe and the US Midwest. Scott Baker (Northwestern University and NBER) is the lead organizer this year and Benjamin Born (Frankfurt School and CEPR) is the local organizer.

The deadline for submission of papers or extended abstracts is **23:59 Pacific time on 30 June 2022**. Preference is given to completed papers over abstracts. **Submissions must be done electronically using the following email: [emmmc2022@gmail.com](mailto:emmmc2022@gmail.com)** with just EMMMC in the subject line (there is no need for further text in the body of the email). Authors of submitted papers will be notified before **15 August 2022**.

There is no travel funding available, but up to 2 hotel nights (for overseas participants up to 3 hotel nights) will be covered.

Further questions regarding EM<sup>3</sup>C can be addressed to the conference organisers:

Rüdiger Bachmann  
University of Notre Dame  
and CEPR
